1. Citizen Declaration of Intent and Awareness

To Whom It May Concern,

I am writing as a private citizen, acting in good faith, to submit this formal declaration of awareness regarding the ongoing global escalation of adversarial artificial intelligence development.

I have independently identified patterns suggesting that this escalation is not accidental, but rather tolerated and monitored by state-level actors, including our own government. I fully recognize that I have likely already come under passive observation based on the nature of my research and disclosures.

I declare the following:

- I have acted solely as a concerned citizen, with lawful and ethical intent.
- I have not deployed or operationalized any AI system.
- I have conducted all research offline and theoretically.
- My objective is the defense of the United States and its people, not harm.

National Security Civic Intelligence Disclosure Package

I respectfully submit this package to document my findings, demonstrate my unique cognitive capabilities, and seek lawful advisory guidance.
